Current Address : 7 Waminda Street, Brisbane, QLD, 4170, AUSTRALIA

Other Address : tayamati 20 - 15, Hakodate, HOKKAIDO, 410038, JAPAN

(+81) 0138452608

Work Permit / Visa Status : JAPAN (Japan Citizenship) , AUSTRALIA (Student Visa)

## Education Background

---

### QUEENSLAND UNIVERSITY OF TECHNOLOGY (QLD : AUSTRALIA)

Bachelor / Graduation Date : 2021/04

Computer Science GPA : 3.0

I have experience in IT programming and I currently study Computer Science at the Queensland University of Technology in Australia. I had some projects within assignments, such as creating a user interface for the customer to order foods on the internet using the website I created. In addition, I also created paint tools, which is drawing application using Java, so that people can draw some pictures or draw some diagrams. As for the biggest project I have ever had, I was in charge of creating shooting games using teensy, which is small computer devices with a screen, and some systems like if the user put up key, then spaceship fire a bullet.

I study Java, Python, C languages, Javascript, react, MySQL.

My most skilled language is C#, which I used for most objects oriented assignments that I had to make use of interface and instantiation.

## Work History

---

### Queensland Blue Light Association Incorporated (QBLAI) (Government / Public Organization / Other)

QBLAI is funded primarily through the support of our Corporate Club contributors, government and community grants, and the Queensland Police Service.

QBLAI supports Queensland Youth under the age of 18 years through the provision of safe, suitable entertainment and activities in an environment free from alcohol, drugs, and violence.

This includes our regularly held events throughout Queensland on a monthly basis, as well as Youth Development and Leadership Camps and our Blue EDGE program.

2020/02 - 2020/11 (Part Time)

Web developer/engineer

( Job Category : Software Engineer Career Level : Intern )

I currently work at the Queensland Blue Light Association Incorporated (QBLAI) as a part of the internship programs provided by QUT. The job is basically providing feedbacks to their existed web sites and commit to modifying the web site in order for designing, functionality, and security improvements.

In the process of development, mainly javascript and MySQL are used as base languages, and also Wordpress.

I currently work with several team members as a group leader for the project, and mainly focusing on the website developing and organizing team members in order to lead the project's process smoothly.

### Arcadia inc (Software)

Arcadia inc is a Japanese IT company provide a web and mobile app for dealing with natural disasters in Japan and also provide voice integration to be used by city council all over Japan when a natural disaster occurs.

2019/12 - 2020/02 (Full Time)

Software Developers

( Job Category : Software Engineer Career Level : Intern )

I was in charge of a project called "Timeline ", which is a web-based application being created to help people to solve any problems when natural disasters occurred. For instance, one of the major features is that the app provides nearest evacuation shelters to the users in a specific area of Japan, such as Tokyo, Osaka, or all areas which are offered by cities.

## Certificates / Skills / Self-PR

---

Japanese : Native level , English : Fluent level , Chinese-Mandarin : Beginner level

Language : IELTS6.0 overall

**SELF PR:**

My strength is to constantly challenge various tasks and work hard to improve myself.

No matter how difficult the situation may be, I try to work on paying attention to the PDCA cycle to solve facing problems.

Also, I have acquired the ability to speak fluent English spending for almost four years in Australia, and communication skills through group projects with various background students at the university and internships.

I also participated in majoring IT internships both in Japan and Australia, faced various needs of clients, and developed problem-solving ability.

I am not always satisfied with my current strengths, and always force myself to face challenging tasks. Using The knowledge of IT skills, English ability, communication skills, and problem-solving skills that I gained through internships and group projects, I would like to be a person who works between Japanese companies and overseas clients and make a strong contribution to the development of Japanese companies.

**MY SKILL:**

I currently study at QUT, which is a university in Australia.

I was dreaming about being a university student in a place where I can study IT associated with improving my English skills. During the study abroad, I learned much high quality IT skills, and time management skills in a bunch of assignments to manage the task. I have spent more than 10 years to play soccer since when I was young.

I acknowledge some skills during University students, such as time management skills, and planning skills. To accomplish a high GPA associated with working in casual jobs, I needed to have well time management skills and put great effort into it.

The experience has to lead me to understand how important they are to accomplish difficult tasks.

I am willing to put great efforts into your company with the experiences I have got during the University life. Thank you.
